PROFESSIONAL SUMMARY

Aspiring Software Engineer and recent B.Tech graduate seeking an entry-level opportunity to apply technical and problem-solving abilities in developing scalable applications. Eager to contribute to organizational growth while gaining practical experience and building a successful career in the software industry.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript
Backend: Spring Boot, RESTful APIs, Object-Oriented Programming (OOP)
Frontend: React.js, HTML5, CSS3, JavaScript
Database: MySQL, Database Indexing, Query Optimization
AI/ML: ML Algorithms, Data Preprocessing, Feature Engineering, Model Training, NumPy, Pandas
Tools & Platforms: VS Code, Eclipse, IntelliJ IDEA, Google Colab, Netlify, Figma, Canva

EXPERIENCE

Frontend Developer Intern | *Infosys Springboard* Feb – Apr

- Built a real-time banking fraud detection system using Java, Spring Boot, React.js, and MySQL to monitor high-volume transactions and detect suspicious activity as it happens, helping reduce financial fraud risk for customers and the bank.
- Created RESTful APIs connected to machine learning models that analyze geolocation and user velocity, improving detection accuracy by 25% and reducing false positives by 18%, which made fraud alerts more reliable and easier to act on.
- Improved MySQL database indexing to support fast, low-latency queries on large volumes of transaction data and alerts.
- Designed simple, responsive React.js screens that show transaction activity and fraud alerts clearly and in real time.

PROJECTS

StudyTrack AI – Student Study Planner
Technologies Used: *React.js, HTML, CSS, JavaScript, Java, Spring Boot, MySQL, AI/ML*

- Developed a student study planner to manage timetables, tasks, reminders, notes, and academic progress in one place.
- Built Spring Boot REST APIs with MySQL to manage timetables, tasks, deadlines, reminders, and subject-wise notes.
- Designed a clean, responsive frontend using React.js, HTML, CSS, and JavaScript for a smooth and user-friendly experience.
- Added AI/ML-based personalized study recommendations to help students plan their time and meet their deadlines.

Student Savings Goal Tracker
Technologies Used: *Core Java, File Handling (Java I/O), OOP Concepts, IntelliJ IDEA*

- Developed a Java application that helps students set savings goals, track contributions, and monitor their savings progress.
- Used OOP concepts to organize the code into reusable, easy-to-maintain classes for better structure and readability.
- Used Java File Handling (I/O) to save and retrieve goal and contribution data so users can continue tracking their progress.
- Generated savings progress summaries to help students manage their goals easily and stay on track with their savings plan.

EDUCATION

B.Tech – Computer Science and Engineering (AI & ML) 2022 – 2026
QIS College of Engineering and Technology, Ongole Percentage: 85%

Intermediate (MPC) 2020 – 2022
Kamala Junior College, Markapur Percentage: 85%

SSC 2020
Om Sai Vikas Vidyaniketan, Markapur Percentage: 90%

CERTIFICATIONS

- Programming with Java – Infosys
- Career Essentials in Generative AI – Microsoft & LinkedIn

SOFT SKILLS

Communication | Time Management | Adaptability | Teamwork | Quick Learner
